Print length : 315 pages

The book is divided into seven sections, each of which covers a different aspect of laryngeal cancer care. The first section provides an overview of the epidemiology, risk factors, and pathology of laryngeal cancer. The second section discusses the various methods of diagnosis and staging of laryngeal cancer. The third section covers the surgical treatment of laryngeal cancer, including open surgery, endoscopic surgery, and laser surgery. The fourth section discusses the nonsurgical treatment of

laryngeal cancer, including radiation therapy, chemotherapy, and immunotherapy. The fifth section covers the rehabilitation of patients with laryngeal cancer, including speech therapy, swallowing therapy, and psychological support. The sixth section discusses the palliative care of patients with laryngeal cancer. The seventh section covers the future directions in the diagnosis and management of laryngeal cancer.

This book is an essential resource for all practitioners who care for patients with laryngeal cancer. It provides a comprehensive overview of the latest advances in the diagnosis and management of this complex disease.

Table of Contents

- Section 1: Epidemiology, Risk Factors, and Pathology of Laryngeal Cancer
