Authored by renowned architectural historian Kurt W. Forster, this meticulously researched book provides a panoramic view of the intellectual landscape that shaped architectural practice. Forster deftly navigates the complexities of architectural theory, making it accessible to students, architects, and anyone fascinated by the history and evolution of architectural thought.

A Journey Through Architectural Eras

'Modern Architectural Theory - Historical Survey 1673-1968' is structured chronologically, taking readers on a journey through distinct architectural eras. Each chapter delves into the theoretical underpinnings of major architectural movements, from the rationalism of the Enlightenment to the postmodernist critique of Modernism.

The book examines the writings of influential architects and theorists, such as Claude Perrault, Giovanni Battista Piranesi, Eugène Viollet-le-Duc, and Le Corbusier. Forster highlights the key concepts that shaped their architectural visions, including function, form, beauty, and the relationship between architecture and society.

Key Features of 'Modern Architectural Theory - Historical Survey 1673-1968'
