## How is cancer diagnosed?

Cancer is typically diagnosed through a combination of tests, including:

- Physical examination
- Blood tests
- Imaging tests, such as X-rays, CT scans, and MRI scans
- Biopsy

## What are the different types of cancer?

There are many different types of cancer, but some of the most common include:

- Breast cancer
- Lung cancer
- Colorectal cancer
- Prostate cancer
- Skin cancer

### **What are the treatment options for cancer?**

The treatment options for cancer depend on the type of cancer, the stage of the cancer, and the overall health of the patient. Treatment options may include:

- Surgery
- Chemotherapy
- Radiation therapy
- Targeted therapy
- Immunotherapy

### **How can you support a loved one through their cancer journey?**

Supporting a loved one through their cancer journey can be challenging, but there are a few things you can do to help:

- Be there for them.

- Listen to them.
- Help them with practical tasks.
- Respect their decisions.
- Take care of yourself.

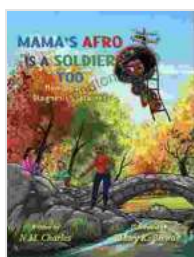

Cancer is a difficult diagnosis, but it is important to remember that there is hope. With the right treatment and support, people with cancer can live long and full lives.
