In today's interconnected world, voice networking has become an essential component of enterprise communication systems. With the proliferation of VoIP (Voice over IP) and Unified Communications, organizations are increasingly relying on voice networks to enhance collaboration, improve productivity, and reduce costs. To meet the growing demand for skilled voice networking professionals, Cisco has developed the CCNP Voice certification.

The CCNP Voice CVOICE 642-437 exam is the foundation-level certification in the CCNP Voice track. This exam validates your knowledge of voice networking concepts, technologies, and protocols. By earning the

CCNP Voice certification, you demonstrate your ability to design, implement, and troubleshoot voice networks in complex enterprise environments.
